ACTION ITEMS

P2023-003 Sphere Renewables LLC Site Plan

City of Fort Lupton Planner Magaly Morales-Tejada opened with a brief introduction of Sphere Renewables. They proposed a new Manufacturing Facility approximately 42,500 square feet with screened outdoor storage on the southern half of the property. The property is located south and adjacent to county road 8, and roughly 650 feet east and across from of Rollie Avenue, zoned I-2 Heavy Industrial. The proposed use complies with zoning, and compatible with existing surrounding uses. Applicant proposing 3 phases to project. The application has been reviewed by referral agencies and the applicant has addressed a majority of comments received. All notification requirements have been met.

Sphere Renewables CEO Richard Grieves, from 5775 Monaco Street Commerce City Colorado, presented their proposal. He started with an overview of Sphere Renewables and how they are an assembly, distribution, and contract manufacturing company for the renewable energy industry. He covered who is a part of the Sphere Renewable's Team, and the collective amount of experience within the industry. Mentioned was one of the major factors in why the company chose Fort Lupton as their site based on proximity to one of their biggest customers, Vestas. Also included was how the site will create 60 jobs, provide work for local businesses, diversification of industries within the city, and their plans to be involved in community outreach.

Scott Koch, VP of Operations, followed up to discuss the construction, parking, and accesses of the new facility. He mentioned the reduced water use landscape plan, to help conserve water but maintain nice landscaping. Also addressed was the screening proposal using cedar fencing.

Chair Simone opened up the public comment portion of this hearing at 6:16 PM, there were no public comments and it was closed at 6:16 PM.

Chair Simone opened up the hearing to Commissioners comments and questions. Commissioners discussed:

CONFORMANCE WITH CITY STANDARDS, REGULATIONS AND POLICIES

Section 16-45 – PUD Planned Unit Development District

a) The Planned Unit Development (PUD) Provisions contained herein are intended to provide for the planning and development of substantial tracts of land, suitable in location and character for the uses proposed, as unified and integrated entities in accordance with detailed development plans.

   The proposed project is for a residential subdivision which will include single-family attached and detached residential lots. The proposed development is designed to provide continuous, direct, convenient, and safe pedestrian pathways throughout the site with the ability to connect to future adjacent subdivisions and development. The site is well situated for housing per the Comprehensive Plan. The plan also provides for diversity in housing types for the community. Staff believes this plan meets the intent of Section 16-45(a).

b) Development within PUD Districts shall require specific approval of the Planning Commission and the City Council as amendments to the "Official Zoning Map" and approval of PUD plans which comply with the requirements and standards set forth in this Chapter and after the requirements of notice and hearing as set forth in this Chapter.

   A concurrent application for a final plat has been submitted for Planning Commission and City Council approval. PUD plans have been submitted for review and approval. Initial zoning and annexation of the Property into the City of Fort Lupton occurred in 2014 through Ordinance 2014-979.

c) PUD plan.

   (1) PUD permit requirements. All development within a PUD District must be in accordance with an approved PUD plan. No building or development permits shall be issued within a PUD District unless they are in conformance with an approved PUD plan for that District. Small wind energy systems are permitted uses in PUDs, provided that they meet the qualifications and criteria for a building permit set forth in Section 18-9 of this Code and are approved as part of the PUD approval process.

A PUD plan has been submitted for the proposed development, and is laid out in the Preliminary PUD Plat maps and related submittal documents included with this Planning Commission packet.

(2) PUD plan format and content, general. In accordance with this Section, PUD plans shall contain unique district regulations that apply to specific parcels of land within a PUD District, including permitted and special uses, lot sizes, bulk, density, general layout, architectural guidelines and location of and standards for public facilities and amenities, and any design standards that vary from the City of Fort Lupton Standards and Specifications for the Design and Construction of Public Improvements. Unless specifically modified by a PUD plan, all provisions of the City's Code and adopted standards and specifications shall apply within PUD Districts. PUD plans shall be in the same general format as required for subdivision plats.

A PUD plan has been submitted for the proposed development, and is laid out in the Preliminary PUD Plat maps and related submittal documents included with this Planning Commission packet. Unless specifically modified by the PUD plan, the subdivision will adhere to all provisions of the City Code.

(3) PUD plan process, general. All PUD plan applications shall be submitted and processed simultaneously with the subdivision applications for the property. PUD plan and subdivision applications may also be processed concurrently with the proposed amendment to the Official Zoning Map, creating a PUD District. Except as specifically provided in this Section, PUD plan applications shall be processed in the same manner as set forth in this Code for major subdivisions, including all pre-application conferences, sketch PUD plan, preliminary PUD plan and final PUD plan applications, public hearings and recording with the County Clerk and Recorder.

These requirements have been met. Initial zoning and annexation of the Property into the City of Fort Lupton occurred in 2014 through Ordinance 2014-979.

(4) Maintenance of private facilities. The owner shall establish an organization for the ownership and maintenance of any approved private streets and/or common open space areas unless other adequate arrangements for the ownership and maintenance thereof are provided in a manner acceptable to the City.

The Applicant is working with the City to finalize the Subdivision Improvement Agreement. The Vista Meadows Metro District will serve as the Home Owner's Association (HOA) and will maintain private facilities.

(5) PUD size. Unless specifically waived by the City Council, the area included in a PUD plan must be at least ten (10) acres in size.

This development is 157.379 acres in size, more or less.

(6) Approval. Approval of a final PUD plan by the City Council shall be by ordinance.

The Vista Meadows Preliminary Plat and PUD Plan will be presented concurrently with the Final Plat and PUD Plan before City Council for approval on June 20, 2023. The change of zone to the PUD zone district occurred in 2014.

d) Intent. PUD provisions are intended to further the following objectives:

(1) To permit and encourage innovative design and high quality, master-planned urban developments on large parcels of land.

(2) To permit greater flexibility in the application of zoning and development standards and greater freedom in providing a mix of land uses in the development of a balanced community.

(3) To preserve critical environmental resources, provide above-average open space and recreational amenities, include exceptional design and provide greater efficiency in the layout and provision of roads, utilities and other infrastructure.

(4) To provide flexibility in land planning and development, resulting in amenable relationships between buildings and ancillary uses, and permitting more intensive use of land where well-related open space and recreational facilities are integrated into overall design.

(5) To encourage unity and diversity in land development, resulting in convenient and harmonious groupings of uses, structures and common facilities, varied type design and layout of housing and other buildings and appropriate relationships of open spaces to intended uses and structures.

(6) To encourage unified and planned development of a site, with or without customary subdivision into single lots, and without specific application of the district regulations as provided for individual lots, subject to the regulations set forth herein.

(7) To provide for and encourage the preservation and enhancement of desirable natural landscape and other features unique to a development site.

(8) To provide reasonable standards and criteria by which the specific proposals for a PUD can be evaluated.

(9) To provide a procedure which can relate the design and layout of unified residential, commercial or industrial developments to the particular site and demand for such development in a manner consistent with the preservation of property values within established residential areas.

With respect to Section 16-45(d)(1)-(9) above, Staff finds that the proposed Preliminary Plat and PUD Plan substantively meet the intent of this subsection. The development of mixed attached and detached single-family residences under PUD zoning provides more cohesion between the different residential types, while also creating generous open spaces for residents.

The proposed PUD and layout of the subdivision promote unity and diversity in uses that would be otherwise difficult with straight zoning. This plat proposes trails and open space that also have the potential to tie the development into the surrounding communities. Any deviations from the City Code are outlined on the PUD Plan.

e) General location and planning requirements.

(1) Relation to major transportation system. PUD districts shall be located with respect to major streets and highways or other transportation facilities to be directly accessible without creating traffic on minor streets in residential areas outside such district.

The southern portion of the subdivision will be accessed from Fitzsimmons Drive which will be laid out as an internal east-west connection. Fitzsimmons Drive will provide access to County Road 29 and to County Road 29 ½, which will be extended.

Estate lots in the north and the homes in the western portion of the property will enter and exit from County Road 12 and County Road 29 respectively. Additional internal roads will be constructed throughout the subdivision and are detailed in the Preliminary Plat. Improvements to County Road 12 are to be completed and the south side of the street paved as a condition of the Subdivision Improvements Agreement for this development.

(2) Relation to public utilities and community facilities. PUD districts shall be located in relation to public utilities and community facilities and services, either existing or to be available by the time development reaches the stage where they will be required, so that such facilities can be provided at reasonable cost and with reasonable efficiency.

Potable and non-potable water will be supplied by the City. Sanitary sewer will be supplied by the City. The developer is working with private utility providers for other utility requirements. Staff finds that the development meets this objective.

(3) Relation to general pattern of urban development. PUD districts shall be planned and located in general compliance with the Comprehensive Plan and shall relate to the major elements of the urban pattern, including housing, commercial facilities and principal places of employment, by physical proximity of major streets so as to provide for the convenience and amenity of residents of the community and to reduce general traffic congestion by a close relationship between origins and destinations.

The Future Land Use Map designates this parcel for Single-Family Detached Residential and Multifamily land uses. Vista Meadows will provide a variety of lot sizes and proposes attached and detached residential units. Vista Meadows is coordinate with the Comprehensive Plan and proposes to add value to surrounding areas through the creation of common open spaces, landscaping, and a trail network throughout the development. The street network will tie into adjacent roads and will provide improvements. It is Staff's opinion that the proposal meets the intent of the Comprehensive Plan.

f) Physical character of the site. The site shall be suitable for the development proposed without hazards to structures, occupants or any property from probability of flooding on the site or on adjacent lands, from erosion or deposition of eroded material on adjacent lands, from subsidence of the soils or from other dangerous conditions. Soil, groundwater level, drainage and topography shall be appropriate to both the kind and pattern of use intended.

The project is not located within a floodplain. The Applicant accounted for drainage as shown on the plat. A soils report was submitted with the application materials and is available for review.

g) Site planning; external relationships.

(1) Vehicular access. Entrances and exits for vehicles shall be designed to encourage smooth traffic flow with minimum hazards to passing traffic or to traffic entering or leaving the development. Merging or turnout lanes may be required where anticipated traffic flows from or to the PUD indicate the need for such lanes. In no case shall streets within a PUD district connect to streets outside the district in such a way as to encourage use of any minor streets for through traffic.

Interior roads will be constructed to create access to each lot. A traffic impact study was submitted with the application materials for review by the City Engineer, Fire District, and Planning Staff. Staff finds that the layout proposed meets the intent of this subsection.

(2) Perimeter setback and screening. If topographical or other barriers do not provide adequate buffer between the PUD and adjacent uses, structures on the perimeter of the PUD shall be set back a distance equal to the minimum setback requirement of the adjoining district, or shall be permanently screened by fences, walls or plantings as required to sufficiently protect the privacy and amenity of adjacent uses, to protect the planned development from potentially adverse external influences such as a major street or highway and, as necessary, to make transition from adjoining district.

The applicant has submitted a landscape plan and worked with Staff to ensure adequate landscaping is provided throughout the development. The perimeter of the development includes landscapiong that will serve as a buffer to surrounding properties. Existent trees, including the cluster of established Cottonwoods in the southwestern area of the development, are to be preserved.

h) Modifications of subdivision regulations.

(1) The improvements required under the subdivision regulations, including streets, storm drainage, sanitary sewerage and potable water systems, shall be provided in each PUD.

The Applicant is working with the City Engineer to finalize a subdivision improvements agreement prior to construction. This agreement will go before City Council for approval. A final drainage report has been included as part of this application.

(2) The requirements and standards for the construction of streets and utilities set forth in the City of Fort Lupton Standards and Specifications for the Design and Construction of Public Improvements shall be subject to modification where the plan and program for a PUD make adequate provision for vehicular and pedestrian access and circulation, recreation, utility and service needs of the tract when fully developed and occupied, and also provide such

covenants, easements or other legal documents and provisions as will assure conformity to and successful implementation of the plan. Such modifications shall be contained within the PUD plan, subject to approval by the City Council.

The Applicant is working with the City Engineer to finalize these improvements prior to construction.

CONFORMANCE WITH THE COMPREHENSIVE PLAN

The Future Land Use Map designates the northern portion of the Property for Single-Family Detached land uses. This designation allows for neighborhoods of predominately single-family detached homes on individual lots. This can consist of a variety of development types, including higher density homes within the City's urban core and planned subdivisions within residential growth areas. The Vista Meadows development is in an area that has been sited for residential uses. In addition to single-family units, the neighborhoods contemplated by the Comprehensive Plan may include scattered single-family attached, detached, and multi-family housing options, as well as public and semi-public uses. Given market demand, single-family neighborhoods are likely to remain prevalent within Fort Lupton.

The southern portion of the Property is designated for Multi-family land uses. This designation allows for multi-family buildings and planned multi-family developments. Multi-family complements traditional single-family detached by offering the highest density options within Fort Lupton. The northeastern portion of Vista Meadows is proposing higher density, attached housing. This mix of housing will provide opportunities to develop affordable housing options and contribute to greater housing diversity. Staff believes that the goals of the multifamily designation for this area have been satisfied.

This proposed application conforms with projected and current land use designations, and provides a diversity of housing types, with estate lots planned for the northernmost portion of the Property, and single-family residential for the western and southern portions. Finally, single-family, attached lots are planned for the eastern portion of the property. This mix of housing types meets the intent of the Future Land Use Map adopted by the City.

The Comprehensive Plan identifies a residential framework and identifies target areas for residential development within the community. Vista Meadows is located within a Residential Growth Area identified in the Comprehensive Plan, with Multi-Family Expansion to the south. While the single-family attached lots are intended to be located in the northeastern quadrant of the community, the City has determined that the intent of the residential framework has been addressed through the establishment of a variety of housing types.

NOTIFICATION REQUIREMENTS

The Subdivision Regulations require published notice of the hearings in a timely manner prior to the hearings. The Planning Commission and City Council hearings were published in the Fort Lupton press on May 18, 2023.

Vista Meadows: Preliminary/Final Plat Narrative
July 18, 2022

General Description/Site Features and Proposed Land Uses

The property is located on south of County Road 12, west of County Road 29, and east of County Road 29 ½. The property is approximately 150 acres with existing PUD zoning. Proposed uses will include 23 residential estate lots, 333 single family detached lots and 56 single family attached residential units. The overall project density is 2.6 du/ac. The development will include pocket parks, open space, and interconnecting trails.

Compliance with the City of Fort Lupton Comprehensive Plan

The proposed development integrates the goals set out in the Town Comprehensive Plan in the following ways:

Growth and Development

The proposed development is designed to provide continuous, direct, convenient, and safe pedestrian pathways throughout the site with the ability to connect to future adjacent subdivisions and development. The site is well situated for housing per the Comprehensive Plan. The plan also provides for diversity in housing types for the community.

Transportation and Mobility

This plan provides a safe and efficient transportation network that accommodates pedestrians, vehicles and bicycles. The primary entrances are located along County Road 29 and County Road 29 1/2. The estate residential lots will take access from County Road 12. A collector roadway meanders through the project, connecting CR 29 to CR 29 ½. The collector roadway will provide convenient access to local streets for vehicles, bicycles and pedestrians. The project is planned as a pedestrian oriented and walkable community with detached sidewalks, tree lawns, street trees and connections throughout the community, to future adjacent neighborhoods.

Parks, Open Space and Environmental Features

The proposed parks, open space and trails within the development will provide high quality recreational opportunities for neighborhood residents and also create connections to future neighborhoods and uses beyond our project boundaries. As shown on the Fort Lupton Proposed Trails Map, the Main Fulton Ditch Trail will be constructed with this development, making a connection through the site and eventually providing pedestrian access to nearby subdivisions to the north and other destinations surrounding Fort Lupton. In addition, this project will construct the Connector Trail proposed along County Road 12. A trail head is centrally located adjacent the collector roadway on-site.

Public Facilities and Services

The proposed development is a logical extension of the City of Fort Lupton public services without placing additional burdens on existing residents and businesses. Infrastructure will be provided so as to meet the requirements of the Comprehensive Plan and/or the Land Use Code.

Water will be provided by the Town of Fort Lupton by connecting to existing 12" potable and non-potable water mains in CR 12 & CR 29.5. There will also be a network of 8" potable and non-potable water mains throughout the site.

Sewer will be provided by the Town of Fort Lupton through a connection to an existing 12" sanitary sewer main on the west end of Mountain Sky Drive in the Mountain Sky Subdivision.

Stormwater will be treated using appropriate water quality measures, with on-site detention being utilized throughout the site to maintain stormwater releases at or below historic rates from the site. Storm water will be conveyed using a series of on-site storm drains culminating to a detention pond in the NW corner of the property. The detention pond will release into a storm drain under CR 12 which will daylight into a swale heading north to the natural drainage way on the west side of the Mountain Sky Subdivision. Stormwater releases will not be allowed into the Fulton Ditch, stormwater and will be conveyed under the ditch.

Compatibility With Adjacent Neighborhoods

Residential development is proposed for the Vista Meadows community. There is currently PUD zoning which is consistent with the property north of CR 12. Residential development, similar is scale, is currently under construction on the north side of CR 12. Property to the east, west and south are currently county properties. There are limited residences surrounding this property with the majority of the land being used for agricultural uses. A large landscape buffer has been proposed along the property boundary for this community. Landscape will be used to create visual interest and provide screening in any necessary locations. Multiple access points have been provided which could serve as both vehicular and pedestrian connections to adjacent development, at the time those properties redevelop. A regional trail through the property will also serve as an amenity for future adjacent developments.

Urban Design Requirements and Architectural Guidelines

Architectural guidelines have been provided with this submittal. A mix of elevations will provide an appealing streetscape while detached walks and tree lawns will support a pedestrian friendly community. Conceptual elevations have been provided.

Description Of Standards For Infrastructure

There are no deviations of design standards proposed for this subdivision.

Description Of Standards To Vary

There are no deviations of design standards or City requirements proposed for this subdivision.

Planned Phasing

Please refer to the phasing designation in the construction documents for specific areas to be included per phase.

The development is proposed in seven phases.

Phase 1 will include 50' lots with and Single Family detached housing products. A portion of the collector roadway within the site as well as required improvements along CR 29 ½ will be constructed with this phase.

Phase 2 will extend the collector roadway through the site, with 50' wide lots.

Phase 3 constructs 50' wide lots.

Phase 4 will include the construction of 50' wide lots, Fulton Ditch trail and will include the construction of two pocket parks

Phase 5 will include the construction of 60' wide lots, the neighborhood park, remainder of trails, and as required improvements along CR 12

Phase 6 will include the construction of 50' and 60' wide lots as well as required improvements along CR 29.

Phase 7 will include the construction of the residential estate lots.

Phase 8 will include the construction of multi-family lots.

Forecast of Projected Construction Timing

The construction of Vista Meadows infrastructure is planned to occur in eight phases, with the first phase of development taking 6 months, and the subsequent phases anticipated to be constructed in 72 months. The commencement of the initial phase of infrastructure is anticipated to occur upon receipt of the required entitlements/permits from the City of Fort Lupton. While the ultimate commencement of future phases of construction will be based on the market absorption of delivered lots and seasonality, the eight phases of development are currently projected to complete by the end of 2029.

Public Services

Fire and Police Protection

Law enforcement for the property would be provided by the Fort Lupton Police Department. It is not anticipated that there would be special security needs or a specific need for additional officers.

Fire protection for the property would be provided by Fort Lupton Fire Department. Fort Lupton Fire Station #2 is located at the northwest corner of County Road 31 and 9th Street. It is not anticipated that the project would pose special fire hazards. Fire prevention requirements, fire detection, fire lanes, emergency access, etc. will be provided as required by code.

Schools

The project is within the Weld Re-8 School District. We will work with the District to identify and address any impacts of this project.

Recreation and Open Space

The project will include park amenities, including open spaces and trails, and active and passive recreation.

Traffic Statement

The property is bordered by County Road 12 to the north, County Road 29 ½ to the east and County Road 29 to the west. A collector road with a 70' ROW will run east/west connecting CR 29 and CR 29 ½. Another local connection will be made at County Road 12 to provide access to the residential estate lots. These connections to surrounding Collectors have been designed to disperse traffic evenly within the development. A full Traffic Impact Study has been included with this submittal.

Statement of Commercial Mineral Deposits

There are currently oil & gas facilities within the property but there are no known commercial mineral deposits on-site.

Environmental

The Vista Meadows property has no known environmentally sensitive areas, wetlands or floodplains on-site. There are no significant groves of trees/vegetation on site or wildlife corridors and/or habitat.

Hazards

There are no known hazards on-site.

Treatment of Conflicting Uses

A landscape buffer area is proposed adjacent to the existing irrigation ditch. A trail will be design along the ditch to serve as an amenity for the subdivision and regional connection for the community. There are existing oil & gas operations on-site. The required buffers, per the municipal code, have been provided and landscape will be used to provide appropriate visual buffers between residential development and oil & gas operations.

Historical or Archaeological Sites

The Vista Meadows property has no known historical significance and/or archaeological sites within the property boundary. There the property is currently a vacant lot with existing oil & gas on-site.

Landscape Design Statement

The design intent for the community landscape is to provide a visually attractive and low maintenance landscape. Water conservation has been considered in the design and a water wise plant palette as has been used. Native seed if used in open space areas and around the perimeter of the property to create consistent transitions to the adjacent properties. Areas of enhanced landscape will be focused on key locations such as entries and park areas. The metro district will maintain all common area landscape.

Vista Meadows Metro District Statement

The District will provide and maintain the Public Improvements necessary to serve the project. The District will also provide ongoing services including: covenant enforcement, design review, and parks, open space and common area ownership and maintenance.

Public Land Dedication

Land dedication for Parks is calculated at 3 residents per single family detached unit and 2.5 residents per duplex unit (multi-family development parcles). The total number of single family detached units is 333 in addition to 23 residential estate lots, resulting in 1103 residents. The multi-family area will be 56 units, resulting in 140 residents for a community total of 1243 residents. Calculating the Community Park at 3 acres / 1000 persons, the required dedicated open space would be 3.72 acres. Open space to be dedicated to Fort Lupton would include a 2.2 ac neighborhood parks along with several smaller pocket parks, and multiple open spaces located throughout the development, providing the remainder of the required dedicated open space. Approximately 31% of the site is currently designated as open space (~47 acres).

The developer will work with the School District to determine the school site requirement. It is anticipated that cash-in-lieu will be the means to meet the school site dedication requirement.

BUILDER SET:

THE SCOPE OF THIS SET OF PLANS IS TO PROVIDE A "BUILDER'S SET" OF CONSTRUCTION DOCUMENTS AND GENERAL NOTES HEREINAFTER REFERRED TO AS "PLANS". THIS SET OF PLANS IS SUFFICIENT TO OBTAIN A BUILDING PERMIT; HOWEVER, ALL MATERIALS AND METHODS OF CONSTRUCTION NECESSARY TO COMPLETE THE PROJECT ARE NOT NECESSARILY DESCRIBED. THE PLANS DELINEATE AND DESCRIBE ONLY LOCATIONS, DIMENSIONS, TYPES OF MATERIALS, AND GENERAL METHODS OF ASSEMBLING OR FASTENING. THEY ARE NOT INTENDED TO SPECIFY PARTICULAR PRODUCTS OR OTHER METHODS OF ANY SPECIFIC MATERIALS, PRODUCT OR METHOD. THE IMPLEMENTATION OF THE PLANS REQUIRES A CLIENT / CONTRACTOR THOROUGHLY KNOWLEDGEABLE WITH THE APPLICABLE BUILDING CODES AND METHODS OF CONSTRUCTION SPECIFIC TO THIS PRODUCT TYPE AND TYPE OF CONSTRUCTION.

CONSTRUCTION REQUIREMENTS AND QUALITY: PROVIDE WORK OF THE SPECIFIC QUALITY; WHERE QUALITY LEVEL IS NOT INDICATED, PROVIDE WORK OF QUALITY CUSTOMARY IN SIMILAR TYPES OF WORK. WHERE THE PLANS AND SPECIFICATIONS, CODES, LAWS, REGULATIONS, MANUFACTURER'S RECOMMENDATIONS OR INDUSTRY STANDARDS REQUIRE WORK OF HIGHER QUALITY OR PERFORMANCE, PROVIDE WORK COMPLYING WITH THOSE REQUIREMENTS AND QUALITY. WHERE TWO OR MORE QUALITY PROVISIONS OF THOSE REQUIREMENTS CONFLICT WITH THE MOST STRINGENT REQUIREMENT; WHERE REQUIREMENTS ARE DIFFERENT BUT APPARENTLY EQUAL, AND WHERE IT IS UNCERTAIN WHICH REQUIREMENT IS MOST STRINGENT, OBTAIN CLARIFICATION FROM THE GMD DESIGN GROUP BEFORE PROCEEDING.

(ALL PENETRATIONS OF FIRE-RATED ASSEMBLIES TO BE AS ALLOWED BY IRC R302.4 AND BUILDING OFFICIAL)

ELECTRICAL

- CAULK THE OPENING AROUND ALL ELECTRICAL AND OTHER SERVICE OUTLET BOXES IN THE PARTY WALL SO THAT THE BOXES ARE AIRTIGHT
- USE NON-HARDENING CAULK TO COVER THE OUTSIDE SURFACE OF THE ELECTRICAL BOXES AT THE TIME OF ROUGH IN.
- SHEET CAULKING FOR JUNCTION BOXES: "FIRESTOP PUDDY PADS."
- USE SHEET CAULKING TO SEAL THE BACK AND SIDES OF ALL JUNCTION BOXES (4 GANG AND SMALLER) RECESSED IN SOUND RATED PARTITIONS.

WALL SILL PLATES

- PRIOR TO SETTING THE WALL PLATES INTO POSITON, THREE (3) CONTINUOUS BEADS OF CAULKING SHOULD BE LAID TO PROVIDE A SEAL BETWEEN THE FLOORING AND LOWER PLATE.
- ACOUSTICAL SEALANT SHALL BE NON-SKINNING, NON-HARDENING FLEXIBLE SEALANT SPECIFICALLY DESIGNED FOR SEALING GYPSUM WALLBOARD.
- USE ACOUSTICAL SEALANT TO FORM AN AIRTIGHT SEAL AT ALL PENETRATIONS AND PERIMETER OF SOUND RATED PARTITIONS. USE BACKER ROD WHERE GAPS TO BE SEALED EXCEED 3/8".
- APPLY ACOUSTICAL SEALANT AS A CONTINUOUS BEAD ALONG GYPSUM BOARD FACE LAYER AT ALL HEAD AND SILL CONDITIONS OF SOUND RATED PARTITIONS
- APPLY EXPANDING FOAM SEALANT WHERE DETAILED AND WHERE MULTIPLE PIPES OR CONDUITS PENETRATE SOUND RATED CONSTRUCTION.

BUILDER SET:

THE SCOPE OF THIS SET OF PLANS IS TO PROVIDE A "BUILDER'S SET" OF CONSTRUCTION DOCUMENTS AND GENERAL NOTES HEREINAFTER REFERRED TO AS "PLANS". THIS SET OF PLANS IS SUFFICIENT TO OBTAIN A BUILDING PERMIT; HOWEVER, ALL MATERIALS AND METHODS OF CONSTRUCTION NECESSARY TO COMPLETE THE PROJECT ARE NOT NECESSARILY DESCRIBED. THE PLANS DELINEATE AND DESCRIBE ONLY LOCATIONS, DIMENSIONS, TYPES OF MATERIALS, AND GENERAL METHODS OF ASSEMBLING OR FASTENING. THEY ARE NOT INTENDED TO SPECIFY PARTICULAR PRODUCTS OR OTHER METHODS OF ANY SPECIFIC MATERIALS, PRODUCT OR METHOD. THE IMPLEMENTATION OF THE PLANS REQUIRES A CLIENT / CONTRACTOR THOROUGHLY KNOWLEDGEABLE WITH THE APPLICABLE BUILDING CODES AND METHODS OF CONSTRUCTION SPECIFIC TO THIS PRODUCT TYPE AND TYPE OF CONSTRUCTION.

CONSTRUCTION REQUIREMENTS AND QUALITY: PROVIDE WORK OF THE SPECIFIC QUALITY; WHERE QUALITY LEVEL IS NOT INDICATED, PROVIDE WORK OF QUALITY CUSTOMARY IN SIMILAR TYPES OF WORK. WHERE THE PLANS AND SPECIFICATIONS, CODES, LAWS, REGULATIONS, MANUFACTURER'S RECOMMENDATIONS OR INDUSTRY STANDARDS REQUIRE WORK OF HIGHER QUALITY OR PERFORMANCE, PROVIDE WORK COMPLYING WITH THOSE REQUIREMENTS AND QUALITY. WHERE TWO OR MORE QUALITY PROVISIONS OF THOSE REQUIREMENTS CONFLICT WITH THE MOST STRINGENT REQUIREMENT; WHERE REQUIREMENTS ARE DIFFERENT BUT APPARENTLY EQUAL, AND WHERE IT IS UNCERTAIN WHICH REQUIREMENT IS MOST STRINGENT, OBTAIN CLARIFICATION FROM THE GMD DESIGN GROUP BEFORE PROCEEDING.

CAULKING OF FIRE WALLS:

(ALL PENETRATIONS OF FIRE-RATED ASSEMBLIES TO BE AS ALLOWED BY IRC R302.4 AND BUILDING OFFICIAL)

ELECTRICAL

- CAULK THE OPENING AROUND ALL ELECTRICAL AND OTHER SERVICE OUTLET BOXES IN THE PARTY WALL SO THAT THE BOXES ARE AIRTIGHT
- USE NON-HARDENING CAULK TO COVER THE OUTSIDE SURFACE OF THE ELECTRICAL BOXES AT THE TIME OF ROUGH IN.
- SHEET CAULKING FOR JUNCTION BOXES: "FIRESTOP PUDDY PADS."
- USE SHEET CAULKING TO SEAL THE BACK AND SIDES OF ALL JUNCTION BOXES (4 GANG AND SMALLER) RECESSED IN SOUND RATED PARTITIONS.

WALL SILL PLATES

- PRIOR TO SETTING THE WALL PLATES INTO POSITON, THREE (3) CONTINUOUS BEADS OF CAULKING SHOULD BE LAID TO PROVIDE A SEAL BETWEEN THE FLOORING AND LOWER PLATE.
- ACOUSTICAL SEALANT SHALL BE NON-SKINNING, NON-HARDENING FLEXIBLE SEALANT SPECIFICALLY DESIGNED FOR SEALING GYPSUM WALLBOARD.
- USE ACOUSTICAL SEALANT TO FORM AN AIRTIGHT SEAL AT ALL PENETRATIONS AND PERIMETER OF SOUND RATED PARTITIONS. USE BACKER ROD WHERE GAPS TO BE SEALED EXCEED 3/8".
- APPLY ACOUSTICAL SEALANT AS A CONTINUOUS BEAD ALONG GYPSUM BOARD FACE LAYER AT ALL HEAD AND SILL CONDITIONS OF SOUND RATED PARTITIONS
- APPLY EXPANDING FOAM SEALANT WHERE DETAILED AND WHERE MULTIPLE PIPES OR CONDUITS PENETRATE SOUND RATED CONSTRUCTION.

BUILDER SET:

THE SCOPE OF THIS SET OF PLANS IS TO PROVIDE A "BUILDER'S SET" OF CONSTRUCTION DOCUMENTS AND GENERAL NOTES HEREINAFTER REFERRED TO AS "PLANS". THIS SET OF PLANS IS SUFFICIENT TO OBTAIN A BUILDING PERMIT; HOWEVER, ALL MATERIALS AND METHODS OF CONSTRUCTION NECESSARY TO COMPLETE THE PROJECT ARE NOT NECESSARILY DESCRIBED. THE PLANS DELINEATE AND DESCRIBE ONLY LOCATIONS, DIMENSIONS, TYPES OF MATERIALS, AND GENERAL METHODS OF ASSEMBLING OR FASTENING. THEY ARE NOT INTENDED TO SPECIFY PARTICULAR PRODUCTS OR OTHER METHODS OF ANY SPECIFIC MATERIALS, PRODUCT OR METHOD. THE IMPLEMENTATION OF THE PLANS REQUIRES A CLIENT / CONTRACTOR THOROUGHLY KNOWLEDGEABLE WITH THE APPLICABLE BUILDING CODES AND METHODS OF CONSTRUCTION SPECIFIC TO THIS PRODUCT TYPE AND TYPE OF CONSTRUCTION.

CONSTRUCTION REQUIREMENTS AND QUALITY: PROVIDE WORK OF THE SPECIFIC QUALITY; WHERE QUALITY LEVEL IS NOT INDICATED, PROVIDE WORK OF QUALITY CUSTOMARY IN SIMILAR TYPES OF WORK. WHERE THE PLANS AND SPECIFICATIONS, CODES, LAWS, REGULATIONS, MANUFACTURER'S RECOMMENDATIONS OR INDUSTRY STANDARDS REQUIRE WORK OF HIGHER QUALITY OR PERFORMANCE, PROVIDE WORK COMPLYING WITH THOSE REQUIREMENTS AND QUALITY. WHERE TWO OR MORE QUALITY PROVISIONS OF THOSE REQUIREMENTS CONFLICT WITH THE MOST STRINGENT REQUIREMENT; WHERE REQUIREMENTS ARE DIFFERENT BUT APPARENTLY EQUAL, AND WHERE IT IS UNCERTAIN WHICH REQUIREMENT IS MOST STRINGENT, OBTAIN CLARIFICATION FROM THE GMD DESIGN GROUP BEFORE PROCEEDING.

CAULKING OF FIRE WALLS:

(ALL PENETRATIONS OF FIRE-RATED ASSEMBLIES TO BE AS ALLOWED BY IRC R302.4 AND BUILDING OFFICIAL)

ELECTRICAL

- CAULK THE OPENING AROUND ALL ELECTRICAL AND OTHER SERVICE OUTLET BOXES IN THE PARTY WALL SO THAT THE BOXES ARE AIRTIGHT
- USE NON-HARDENING CAULK TO COVER THE OUTSIDE SURFACE OF THE ELECTRICAL BOXES AT THE TIME OF ROUGH IN.
- SHEET CAULKING FOR JUNCTION BOXES: "FIRESTOP PUDDY PADS."
- USE SHEET CAULKING TO SEAL THE BACK AND SIDES OF ALL JUNCTION BOXES (4 GANG AND SMALLER) RECESSED IN SOUND RATED PARTITIONS.

WALL SILL PLATES

- PRIOR TO SETTING THE WALL PLATES INTO POSITON, THREE (3) CONTINUOUS BEADS OF CAULKING SHOULD BE LAID TO PROVIDE A SEAL BETWEEN THE FLOORING AND LOWER PLATE.
- ACOUSTICAL SEALANT SHALL BE NON-SKINNING, NON-HARDENING FLEXIBLE SEALANT SPECIFICALLY DESIGNED FOR SEALING GYPSUM WALLBOARD.
- USE ACOUSTICAL SEALANT TO FORM AN AIRTIGHT SEAL AT ALL PENETRATIONS AND PERIMETER OF SOUND RATED PARTITIONS. USE BACKER ROD WHERE GAPS TO BE SEALED EXCEED 3/8".
- APPLY ACOUSTICAL SEALANT AS A CONTINUOUS BEAD ALONG GYPSUM BOARD FACE LAYER AT ALL HEAD AND SILL CONDITIONS OF SOUND RATED PARTITIONS
- APPLY EXPANDING FOAM SEALANT WHERE DETAILED AND WHERE MULTIPLE PIPES OR CONDUITS PENETRATE SOUND RATED CONSTRUCTION.

THESE DOCUMENTS ARE THE PROPERTY OF THE DESIGNER AND SHALL NOT BE COPIED, DUPLICATED, ALTERED, MODIFIED OR REVISED IN ANY WAY WITHOUT THE EXPRESSED WRITTEN APPROVAL OF THE DESIGNER.

CONTRACTOR SHALL VERIFY ALL CONDITIONS AND DIMENSIONS AT THE SITE AND ALL INCONSISTENCES SHALL BE BROUGHT TO THE ATTENTION OF THE DEVELOPER AND THE DESIGNER BEFORE PROCEEDING WITH WORK.

ANY ERRORS OR OMISSIONS FOUND IN THESE DRAWINGS SHALL BE BROUGHT TO DEVELOPERS AND DESIGNERS ATTENTION IMMEDIATELY.

DO NOT SCALE DRAWINGS. WRITTEN DIMENSIONS TAKE PRECEDENCE OVER SCALED DIMENSIONS.

ALL DIMENSIONS ARE TO FACE OF STUD OR TO FACE OF FRAMING UNLESS OTHERWISE NOTED.

ALL TRUSS DRAWINGS TO BE REVIEWED AND APPROVED BY THE STRUCTURAL ENGINEER PRIOR TO ISSUANCE OF BUILDING PERMIT.

ALL OR EQUAL SUBSTITUTIONS MUST BE SUBMITTED TO AND APPROVED BY CITY BUILDING OFFICIAL PRIOR TO INSTALLATION.

ALL ANGLED PARTITIONS ARE 45 DEGREES UNLESS OTHERWISE NOTED.

PROVIDE FIREBLOCKING. (PER RCO SECTION 602.8)

ALL ELECTRICAL AND MECHANICAL EQUIPMENT AND METERS ARE SUBJECT TO RELOCATION DUE TO FIELD CONDITIONS, CONTRACTOR TO VERIFY.

DAMP PROOFING - ONE COAT CONTINUOUS ELECTROMETRIC WATERPROOFING FROM GRADE LEVEL TO BOTTOM OF FOUNDATION WALL.

TO THE BEST OF THE DESIGNER'S KNOWLEDGE THESE DOCUMENTS ARE IN CONFORMANCE WITH THE REQUIREMENTS OF THE BUILDING AUTHORITIES HAVING JURISDICTION OVER THIS TYPE OF CONSTRUCTION AND OCCUPANCY.

SHOP DRAWING REVIEW AND DISTRIBUTION, ALONG WITH PRODUCT SUBMITTALS, REQUESTED IN THE CONSTRUCTION DOCUMENTS, SHALL BE THE SOLE RESPONSIBILITY OF THE GENERAL CONTRACTOR, UNLESS DIRECTED OTHERWISE UNDER A SEPARATE AGREEMENT.

DEVIATIONS FROM THESE DOCUMENTS IN THE CONSTRUCTION PHASE SHALL BE REVIEWED BY THE DESIGNER AND THE OWNER PRIOR TO THE START OF WORK IN QUESTION. ANY DEVIATIONS FROM THESE DOCUMENTS WITHOUT PRIOR REVIEW, SHALL BE THE SOLE RESPONSIBILITY OF THE GENERAL CONTRACTOR.

THE BUILDER SHALL FURNISH ANY AND ALL REPORTS RECEIVED FROM THE GEOTECHNICAL ENGINEER (SOILS REPORT), ON THE STUDY OF THE PROPOSED SITE, TO THE DESIGNER, STRUCTURAL ENGINEER, AND GENERAL CONTRACTOR. IN THE EVENT THE GEOTECHNICAL REPORTS DO NOT EXIST, THE SOILS CONDITION SHALL BE ASSUMED TO BE A MINIMUM DESIGN SOIL PRESSURE STATED BY THE STRUCTURAL ENGINEER OF RECORD FOR THE PURPOSE OF STRUCTURAL DESIGN. GENERAL CONTRACTOR SHALL ASSURE THE SOIL CONDITIONS MEET OR EXCEED THE CRITERIA.

ALL WORK PERFORMED BY THE GENERAL CONTRACTOR SHALL COMPLY AND CONFORM WITH LOCAL AND STATE BUILDING CODES, ORDINANCES AND REGULATIONS, ALONG WITH ALL OTHER AUTHORITIES HAVING JURISDICTION. THE GENERAL CONTRCATOR IS RESPONSIBLE TO BE AWARE OF THESE REQUIREMENTS AND GOVERNING REGULATIONS.

WINDOW SUPPLIER TO VERIFY AT LEAST ONE WINDOW IN ALL BEDROOMS TO HAVE A CLEAR EGRESS OPENING OF 5.7 SQ FT WITH MIN. DIMENSION OF 24" IN HEIGHT AND 20" IN WIDTH: SILL HEIGHT NOT GREATER THAN 44" ABOVE FLOOR. (PER RCO SECTION 310.1.1)

ALL HANDRAIL BALLUSTERS TO BE SPACED SUCH THAT A 4" SPHERE CANNOT PASS BETWEEN BALLUSTERS. (PER RCO SECTION 312.1.3)

PROVIDE STAIR HANDRAILS AND GUARDRAILS PER RCO SECTION 311.1.8 AND 312

BUILDER SET:

THE SCOPE OF THIS SET OF PLANS IS TO PROVIDE A "BUILDER'S SET" OF CONSTRUCTION DOCUMENTS AND GENERAL NOTES HEREINAFTER REFERRED TO AS "PLANS". THIS SET OF PLANS IS SUFFICIENT TO OBTAIN A BUILDING PERMIT; HOWEVER, ALL MATERIALS AND METHODS OF CONSTRUCTION NECESSARY TO COMPLETE THE PROJECT ARE NOT NECESSARILY DESCRIBED. THE PLANS DELINEATE AND DESCRIBE ONLY LOCATIONS, DIMENSIONS, TYPES OF MATERIALS, AND GENERAL METHODS OF ASSEMBLING OR FASTENING. THEY ARE NOT INTENDED TO SPECIFY PARTICULAR PRODUCTS OR OTHER METHODS OF ANY SPECIFIC MATERIALS, PRODUCT OR METHOD. THE IMPLEMENTATION OF THE PLANS REQUIRES A CLIENT / CONTRACTOR THOROUGHLY KNOWLEDGEABLE WITH THE APPLICABLE BUILDING CODES AND METHODS OF CONSTRUCTION SPECIFIC TO THIS PRODUCT TYPE AND TYPE OF CONSTRUCTION.

CONSTRUCTION REQUIREMENTS AND QUALITY: PROVIDE WORK OF THE SPECIFIC QUALITY; WHERE QUALITY LEVEL IS NOT INDICATED, PROVIDE WORK OF QUALITY CUSTOMARY IN SIMILAR TYPES OF WORK. WHERE THE PLANS AND SPECIFICATIONS, CODES, LAWS, REGULATIONS, MANUFACTURER'S RECOMMENDATIONS OR INDUSTRY STANDARDS REQUIRE WORK OF HIGHER QUALITY OR PERFORMANCE, PROVIDE WORK COMPLYING WITH THOSE REQUIREMENTS AND QUALITY. WHERE TWO OR MORE QUALITY PROVISIONS OF THOSE REQUIREMENTS CONFLICT WITH THE MOST STRINGENT REQUIREMENT; WHERE REQUIREMENTS ARE DIFFERENT BUT APPARENTLY EQUAL, AND WHERE IT IS UNCERTAIN WHICH REQUIREMENT IS MOST STRINGENT, OBTAIN CLARIFICATION FROM THE GMD DESIGN GROUP BEFORE PROCEEDING.

THIS SET OF PLANS IS SUFFICIENT TO OBTAIN A BUILDING PERMIT; HOWEVER, ALL MATERIALS AND METHODS OF CONSTRUCTION NECESSARY TO COMPLETE THE PROJECT ARE NOT NECESSARILY DESCRIBED. THE PLANS DELINEATE AND DESCRIBE ONLY LOCATIONS, DIMENSIONS, TYPES OF MATERIALS, AND GENERAL METHODS OF ASSEMBLING OR FASTENING. THEY ARE NOT INTENDED TO SPECIFY PARTICULAR PRODUCTS OR OTHER METHODS OF ANY SPECIFIC MATERIALS, PRODUCT OR METHOD. THE IMPLEMENTATION OF THE PLANS REQUIRES A CLIENT / CONTRACTOR THOROUGHLY KNOWLEDGEABLE WITH THE APPLICABLE BUILDING CODES AND METHODS OF CONSTRUCTION SPECIFIC TO THIS PRODUCT TYPE AND TYPE OF CONSTRUCTION.

CONSTRUCTION REQUIREMENTS AND QUALITY: PROVIDE WORK OF THE SPECIFIC QUALITY; WHERE QUALITY LEVEL IS NOT INDICATED, PROVIDE WORK OF QUALITY CUSTOMARY IN SIMILAR TYPES OF WORK. WHERE THE PLANS AND SPECIFICATIONS, CODES, LAWS, REGULATIONS, MANUFACTURER'S RECOMMENDATIONS OR INDUSTRY STANDARDS REQUIRE WORK OF HIGHER QUALITY OR PERFORMANCE, PROVIDE WORK COMPLYING WITH THOSE REQUIREMENTS AND QUALITY. WHERE TWO OR MORE QUALITY PROVISIONS OF THOSE REQUIREMENTS CONFLICT WITH THE MOST STRINGENT REQUIREMENT; WHERE REQUIREMENTS ARE DIFFERENT BUT APPARENTLY EQUAL, AND WHERE IT IS UNCERTAIN WHICH REQUIREMENT IS MOST STRINGENT, OBTAIN CLARIFICATION FROM THE GMD DESIGN GROUP BEFORE PROCEEDING.

THE SCOPE OF THIS SET OF PLANS IS TO PROVIDE A "BUILDER'S SET" OF CONSTRUCTION DOCUMENTS AND GENERAL NOTES HEREINAFTER REFERRED TO AS "PLANS". THIS SET OF PLANS IS SUFFICIENT TO OBTAIN A BUILDING PERMIT; HOWEVER, ALL MATERIALS AND METHODS OF CONSTRUCTION NECESSARY TO COMPLETE THE PROJECT ARE NOT NECESSARILY DESCRIBED. THE PLANS DELINEATE AND DESCRIBE ONLY LOCATIONS, DIMENSIONS, TYPES OF MATERIALS, AND GENERAL METHODS OF ASSEMBLING OR FASTENING. THEY ARE NOT INTENDED TO SPECIFY PARTICULAR PRODUCTS OR OTHER METHODS OF ANY SPECIFIC MATERIALS, PRODUCT OR METHOD. THE IMPLEMENTATION OF THE PLANS REQUIRES A CLIENT / CONTRACTOR THOROUGHLY KNOWLEDGEABLE WITH THE APPLICABLE BUILDING CODES AND METHODS OF CONSTRUCTION SPECIFIC TO THIS PRODUCT TYPE AND TYPE OF CONSTRUCTION.

CONSTRUCTION REQUIREMENTS AND QUALITY: PROVIDE WORK OF THE SPECIFIC QUALITY; WHERE QUALITY LEVEL IS NOT INDICATED, PROVIDE WORK OF QUALITY CUSTOMARY IN SIMILAR TYPES OF WORK. WHERE THE PLANS AND SPECIFICATIONS, CODES, LAWS, REGULATIONS, MANUFACTURER'S RECOMMENDATIONS OR INDUSTRY STANDARDS REQUIRE WORK OF HIGHER QUALITY OR PERFORMANCE, PROVIDE WORK COMPLYING WITH THOSE REQUIREMENTS AND QUALITY. WHERE TWO OR MORE QUALITY PROVISIONS OF THOSE REQUIREMENTS CONFLICT WITH THE MOST STRINGENT REQUIREMENT; WHERE REQUIREMENTS ARE DIFFERENT BUT APPARENTLY EQUAL, AND WHERE IT IS UNCERTAIN WHICH REQUIREMENT IS MOST STRINGENT, OBTAIN CLARIFICATION FROM THE GMD DESIGN GROUP BEFORE PROCEEDING.
